

Jenn Humberstone

Jenn Humberstone is a Fisheries Project Director for the California Oceans Program at The Nature Conservancy (TNC). In this role she leads efforts to reduce entanglement risk to marine life, working closely with fishermen, managers and other stakeholders towards the dual goal of thriving marine ecosystems and thriving fisheries. Her work includes driving innovative approaches to cooperative adaptive management, lost gear recovery and cutting-edge collaborative research. Jenn brings an interdisciplinary background and a history of championing collaborative and stakeholder-driven approaches, founded in service as a Peace Corps volunteer. Prior to joining TNC she managed sustainability and traceability evaluations of fisheries worldwide for Marine Stewardship Council certification. Jenn holds a Master of Environmental Science and Management degree from the Bren School at the University of California Santa Barbara and a Bachelor of Business Administration degree from Emory University.
