

Dr. Jarrod Santora

Dr. Jarrod Santora is an Associate Researcher in the Department of Applied Mathematics at the University of California Santa Cruz. He studies ecosystem oceanography and spatial dynamics of predator-prey interactions within polar and temperate marine ecosystems. His research focuses on the application of data-driven models to examine marine ecosystem processes in order to benefit ecosystem-based fishery management and conservation of marine living resources. He received his PhD in Ecology, Evolution and Behavior from the City University of New York.
